Introducing our groundbreaking one-day training course, Digital Guardians: Advanced Techniques in Online Child Exploitation Investigations. This cutting-edge program is meticulously crafted for law enforcement professionals seeking to enhance their skills in combating online child exploitation. Designed by industry experts, the course seamlessly integrates theoretical knowledge with hands-on practical exercises, ensuring participants are equipped with the latest strategies and tools. Delve into key modules covering infrastructural advancements, recent legal cases shaping investigations, the strategic use of undercover accounts, proactive operational methodologies, and advanced interrogation techniques. Participants will gain unparalleled insights into the evolving landscape of online crimes against children, empowering them to stay ahead in this critical field. Join us for a transformative learning experience that will sharpen your investigative prowess and contribute to safeguarding vulnerable individuals in the digital age.

Topics Covered:

- Analyze recent landmark cases influencing the legal landscape of child exploitation investigations.
- Understand the implications of court rulings on evidence admissibility and investigative methodologies.
- Master the art of creating and managing undercover online personas to infiltrate criminal networks.
- Learn ethical and legal considerations in maintaining the integrity of undercover operations.
- Utilize social engineering and psychology to communicate with suspects.
- Develop proactive strategies for identifying and neutralizing online threats against children.
- Case studies on successful proactive operations, emphasizing prevention and intervention. Hone interrogation skills tailored to online child exploitation cases.
- Learn psychological insights and communication strategies for effective suspect interviews.

Students are encouraged to bring a laptop and UC phone to the course, as they will be provided numerous resources in class to begin building their undercover account. Students will also receive a list of investigative resources in the class and shown numerous free databases/resources during the class.

INSTRUCTOR: Detective Sewall is a highly commended detective working primarily undercover on internet crimes against children cases. He is known for his ability to use trending technology and applications to find and exploit the new online "playground" of child predators. He has organized multi-defendant proactive undercover online operations while using undercover chatting and personas which have resulted in hundreds of child enticement, child pornography and child sexual assault arrest and convictions.
